

## Just A Number by Lana Fitton

In 8 months

36 weeks

252 days

11.8 million cases all together

252 thousand deaths

2,182 children

And 53 mother's to be

All of those people died

With only strangers by their sides

No family to hug

Or to share their last cries

They spent their last days

Breathing from a tube

Not seeing their family

Unless its on zoom

Corona is altering death

and how it's observed

as morgues replace a ceremony

that all of them deserved.

42 states in red

7 are orange and

2 are barely touched

16 known symptoms

That many misjudge

To the world they are just numbers

You don't give it a thought

But think about your family

And all the joy they have brought

So wear that "stupid" mask

And stay 6 feet away

Because if you don't care

Corona will stay
